

OnGuard® Credentials client

Browser-based Cardholder Management for OnGuard Systems

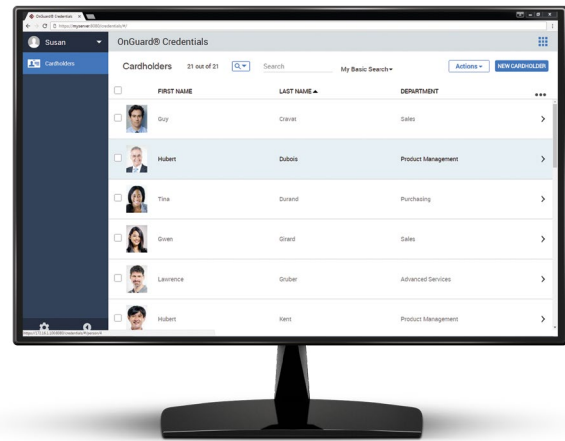

No client software installation required

Overview

The OnGuard® Credentials client offers a browser-based alternative to the traditional OnGuard ID CredentialCenter Windows® application, enabling cardholder, badge, and access level management without client installation and upgrades. Users can securely access credentialing through a supported web browser on their desktop, laptop, or tablet.

Based on HTML5 standards, the OnGuard Credentials client features a responsive user interface and supports a wide range of client platforms. It even enables photo capture through the camera on a tablet, as well as through a built-in or USB-attached camera on a laptop or desktop computer.

Designed with the user in mind, this flexible browser-based application provides a fresh take on cardholder and access rights management. A list of cardholders with simple sorting and rich filtering options is always visible, while a scrollable pane with expandable sections for cardholder, badge, and access level information puts all critical information at your fingertips.

Features & Functionality

- Presentation of cardholder, badge, and access level information for an individual on a single page
- Option to customize cardholder list view by adding, removing and rearranging columns
- Sortable list of cardholders with single-click sorting
- Cardholder list that shows photo thumbnails for quick reference and identification
- Print the customized list of cardholders directly from browser
- Photo capture via connected camera on supported browsers
- Option to crop, rotate and compress cardholder images
- Full support for OnGuard user-defined fields and cardholder detail pages
- Modern search-as-you-type (incremental search) results for cardholders, badges and access levels
- Flexible, powerful list filtering
- Ability to seamlessly issue mobile credentials to smartphones
- Supports OnGuard database segmentation
- Searches and preferences can be saved

Prerequisites for the OnGuard Credentials client

- OnGuard® version 7.3 or higher
- OnGuard server with Port 8080 open for client connections
- For OnGuard Enterprise system, OnGuard Credentials can be purchased and installed on any region or master

Please note: The OnGuard Credentials client is licensed on a per-concurrent-seat basis.

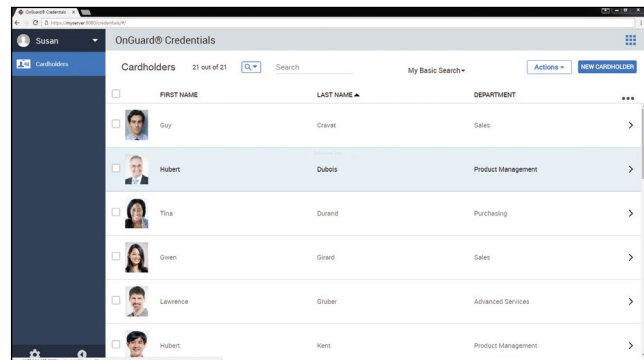

OnGuard ID CredentialCenter features not included in OnGuard Credentials

Some tasks still require the OnGuard ID CredentialCenter Windows® client, for example:

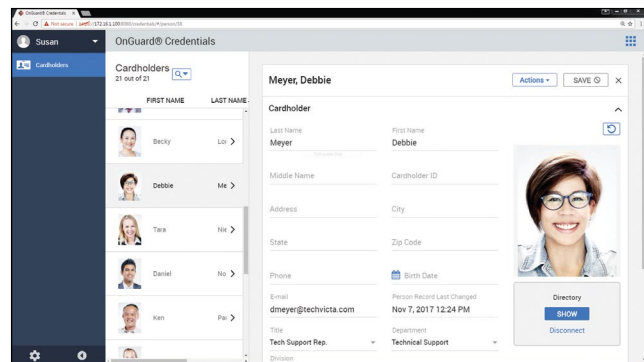

- Smartcard and magstripe encoding
- Badge printing
- Biometric capture & template management
- Asset management
- Precision access
