

OnGuard® WATCH module for OnGuard version 7.5 and up

Optimize your system.  
Maximize your effectiveness.

**Make smarter, faster decisions  
with OnGuard WATCH.**

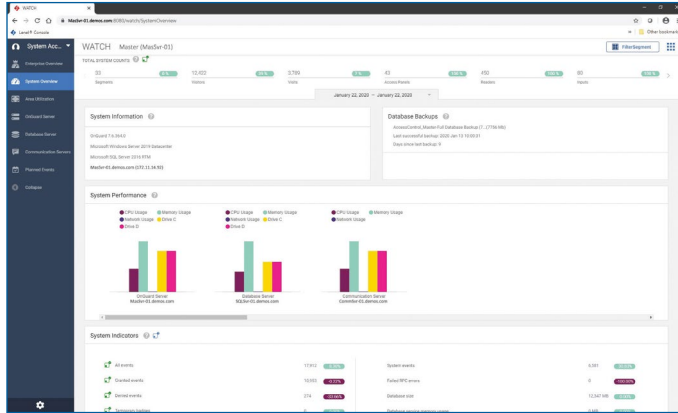

OnGuard WATCH (Web Access Trending Comprehensive Health) is a web-based analysis tool that can optimize the effectiveness of your OnGuard system. Innovative and intuitive, OnGuard WATCH constantly collects system data and displays it on user-friendly dashboards, giving you a complete overview and the ability to identify and respond to system needs more quickly and effectively than ever before.

# A more intelligent way to manage your system.

OnGuard® WATCH (Web Access Trending Comprehensive Health) analysis tool provides a detailed overview of your whole OnGuard system on customizable dashboards. Instead of having to use multiple tools, OnGuard WATCH allows you to quickly view important OnGuard system information and respond to it proactively.

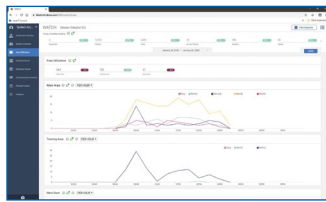

## Customizable dashboards to display complete system data including:

### OnGuard WATCH System Overview

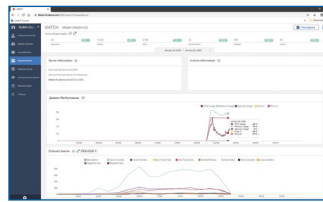

The OnGuard WATCH System Overview dashboard provides a snapshot of key system information, including:

- Overall system performance information
- Database backups
- Performance metrics for each server
- Key system performance indicators
- Area utilization information
- System counts for access panels, readers, inputs, outputs, cardholders, badges and visitors
- Segmentation filters data views by a single segment or segment group
- Enterprise Overview page provides data and insights for regions and master database
- Purge Raw Data option

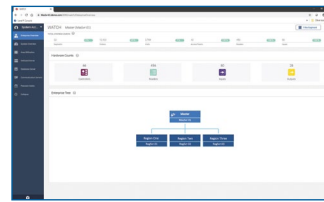

### Area Utilization

Displays activity in user-defined physical and logical areas, giving you a comprehensive understanding of the activity in the areas you want to monitor.

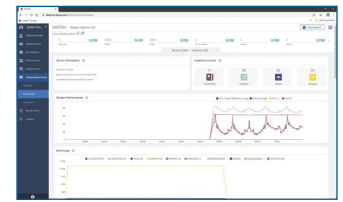

### OnGuard Server Database Server

Shows key parameters of server operation, including operating system, database and OnGuard software versions.

### Enterprise Overview

Provides awareness of the overall Enterprise capacities, device counts, and a graphical representation of your enterprise architecture.

### Communication Servers

Displays the key parameters of the communication servers, with each configured server being allocated its own page.

## OnGuard WATCH Lite

OnGuard WATCH lite version is available at no additional charge to users with a LenelS2 Software Upgrade and Support Plan (SUSP). This feature-light version provides a snapshot of the OnGuard application server performance and includes the System Overview dashboard.

## Licensing & Compatibility

OnGuard WATCH license options include an annual subscription or a non-expiring license, and requires an active LenelS2 Software Upgrade and Support Plan (SUSP).

OnGuard WATCH version 1.4 requires OnGuard version 7.5 software or higher. Oracle Databases are not supported.
