

Access Control Solutions

OnGuard®

Representing an advanced access control system, OnGuard is a feature-rich solution that is well-suited for K-12 environments. With OnGuard, administrators can perform a variety of security operations, all through an intuitive, user-friendly interface.

Visitor Management

Visitor Management lets administrators monitor visitor activity with detailed audit reporting, historical analysis and real-time report generation during emergencies.

Watchlist Integration

As added security and convenience for K-12 applications, OnGuard's Watchlist Integration application syncs with customer-defined databases to scan the entire faculty, staff and pre-scanned visitor population. If matches are found, access to school facilities will automatically be disabled while each individual is reviewed.

For a reliable, cost-effective option for K-12 facilities, OnGuard delivers comprehensive security from a robust and industry-leading system.

Access Control Integration

OpenAccess Alliance Program

Lenel's OpenAccess Alliance Program (OAAP) offers flexibility when developing K-12 security solutions. School administrators can choose from a wide variety of more than 100 OAAP member manufacturers and brands, like those listed below, whose products will integrate seamlessly with an OnGuard security platform.

WIRELESS LOCKS

ASSA ABLOY and Schlage solutions protect school entrances and assets with a range of wireless locking technologies for a variety of lock types.

- Visual indicators on locks for easy determination if the door is secure
- Locks and exit devices are lockable from inside
- Control individual access to classrooms or designated areas
- Initialize lock-down during emergencies centrally or from individual rooms

KEY MANAGEMENT

The Traka intelligent key management system controls access to keys or key sets.

- Manage all transportation vehicles assigned to a particular school
- Prevent keys from being used without proper access
- Require school bus drivers to pass a breathalyzer test prior to receiving a bus key
- Eliminate manual key distribution with automated vending

LOCKING DEVICES

Traka's RFID-enabled iPad/tablet lockers make issuing, tracking and controlling tablets in the classroom easier on teachers.

- Synchronize all tablets simultaneously
- Allocate usage schedules, preventing tablets from being removed once allocated time expires
- System alert issued if iPad/tablet is not returned on time
- Built-in charging

ASSA ABLOY offers locker and cabinet locks to improve security of physical assets.

- Assign or revoke student access
- Restrict access to facility records
- Improve the security and monitoring of sensitive research and student data within each server cabinet

INTERCOM WITH VIDEO

Stentofon's advanced intercom technology provides crisp, clear notifications during critical situations.

- Two-way communication between classrooms or central office
- Safety Sensor automatically activates live streaming video if tripped
- Audio channel can provide evacuation procedures to classrooms or give main office audio/visual on classrooms

ASSET MANAGEMENT (HUMAN AND PHYSICAL)

GuardRFID's K-12 Safeguard system accurately tracks equipment, materials and people (students, teachers and support staff) for enhanced security.

- Staff badges can transmit alerts to selected security agencies
- Configurable into established lockdown and tracking zones
- Real-time dashboard provides a visual of every student and staff member
- Hands-free access control

MASS NOTIFICATION

Amika Mobile facilitates clear and critical communications across large populations during emergencies.

- Mobile and desktop panic buttons show location of panic user
- Trigger lockdown from mobile panic apps
- Two-way responses from SMS to know who needs help
