

Video Surveillance

The watchful eyes of teachers and administrators are indispensable in creating a safe learning environment. But even the largest staff can't be in all places at all times. A smartly placed video surveillance system can help monitor day-to-day operations, collect evidence of criminal behavior and even validate legal claims.

Interlogix offers a comprehensive portfolio of IP and analog video options with an open platform for enhanced compatibility. Our leading network of security professionals can develop a complete video solution that addresses your school's unique needs, letting you attend to your highest priority – your students' learning.

Video Products

IP AND ANALOG CAMERAS

Capture crisp, high-resolution images, even in nighttime or low-light conditions, with our wide selection of digital and analog cameras.

- A variety of form factors and mounting options accommodates any indoor or outdoor installation
- Vandal-resistant housings provide additional protection
- Advanced technologies deliver high-resolution images and superior low-light performance
- Wide-angle and zoom lenses are ideal for parking lots, practice fields and challenging corridors

SOFTWARE

TruVision® Navigator v5 brings together the latest video management technologies in one streamlined, intuitive interface.

- Allows you to access and control surveillance systems at multiple schools from one central location
- Makes playback and sharing of evidence easy and instantaneous
- Allows you to remotely control cameras and create custom groupings of video streams
- Optional mobile apps enable authorized persons to access and control system within school grounds via mobile devices

RECORDERS AND MONITORS

Quickly and easily monitor, record, store and retrieve surveillance footage with our user-friendly recorders and monitors.

- Analog and network recorders offer reliable, real-time recording and advanced features
- LCD color monitors are engineered specifically for 24/7 operation for years of trouble-free operation and optimum picture quality
- Linux-based storage system lowers security risks and allows you to store footage for extended periods
- Open Commercial Off-The-Shelf Storage (COTS) recording software easily integrates with Video Management software to deliver a seamless video management experience

NETWORK TRANSMISSION

Create a high-performance IP video network while leveraging your current investment in cabling infrastructure.

- IFS Network Switches provide enterprise-class performance for demanding IP video applications
- Industry-compliant and remote management capabilities work seamlessly with your existing IT network
- Cost-effective analog to IP solutions utilize existing coax and fiber infrastructure within your facilities
- Digital fiber optic products offer innovative solutions for video, access control and intercom applications
